

NGUYEN VAN CHIEN

Project Manager | PMP® | Process & Engineering Specialist

✉ chiennvbk@gmail.com

📍 An Phu, Hai Phong, Vietnam

☎ (+84) 375 252 645

◆ PMP® No. 4159343 (valid to 07/2031)

PROFESSIONAL SUMMARY

PMP®-certified Project Manager and Senior Process Engineer with 10+ years of experience delivering EPC, EPCm, and feasibility studies across mining, oil & gas, and chemical processing. Proven track record managing multi-disciplinary international projects across Australia, Papua New Guinea, Vietnam, Ghana, Armenia, and the Netherlands - from scoping study through to Class 2 feasibility and plant commissioning. Deep technical expertise in process design, HAZOP/SIL, and HYSYS simulation enables effective engineering leadership and informed project decisions. Currently serving as Technical Manager at Mincore Pty Ltd, overseeing gold, lithium, rare earth, and nickel studies for global clients.

CORE COMPETENCIES

Project Management

- PMP® Certified
- Budget & Schedule Control
- Risk Management
- EPC / EPCm Delivery
- MS Project

Process Engineering

- HYSYS Simulation
- P&ID / PFD / BFD
- HAZOP / HAZID / SIL
- Relief & Flare Systems
- Mass & Energy Balance

Tools & Languages

- AutoCAD, SketchUp
- PipeFlow, HYSYS
- MS Office (Advanced)
- English (Professional)
- Vietnamese (Native)

PROFESSIONAL EXPERIENCE

Technical Manager (promoted from Process Engineer / Study Manager) | Mincore Pty Ltd

Oct 2023 - Present

Mincore Pty Ltd · Brisbane, Australia (remote-based, Vietnam)

Mincore is an Australian engineering consultancy specialising in mineral processing FS and plant design.

- Lead technical delivery and project management for feasibility studies and scoping studies across gold, lithium, rare earth, nickel, and selenium processing projects in 6 countries.
- Manage budgets, schedules, and quality across concurrent multi-million-dollar study programs; provide regular executive-level status reports to clients and senior leadership.
- Coordinate cross-functional teams of process, structural, and mechanical engineers alongside external vendors and client stakeholders.
- Promoted to Technical Manager within 9 months based on demonstrated project leadership and technical delivery performance.

Kumul Gold Refinery Class 2 Feasibility Study - Papua New Guinea | Project Manager

- Managed full feasibility study for a 3,000,000oz/yr (85 tpa) gold refinery from scope definition through to bankable Class 2 report, coordinating a multi-discipline team across engineering, procurement, and financial analysis workstreams.
- Directed location selection trade-off study, CAPEX/OPEX modelling, and technology evaluation, delivering the study on schedule and within budget.
- Served as primary point of contact for the Papua New Guinea client, maintaining alignment across all project milestones.

1275 Selenium Processing Plant (EPCm) - Thailand | Project Manager

- Directed full EPCm delivery of a 500tpa Selenium Selenite processing plant from FEED through commissioning.
- Managed engineering deliverables (PFD, P&ID, equipment lists), vendor procurement, and client reporting across a 12-month project timeline.
- Maintained project cost control and schedule adherence through proactive risk identification and scope management.

Broula King Pre-Feasibility Study - Australia | Project Manager

- Led pre-feasibility study for a 40,000tpa demonstration plant targeting Au, Ag, Fe, Pb, Cu, Zn, Sb, and As recovery from Sunny Corner Slag and Fosterville tailings.
- Delivered CAPEX/OPEX estimates, study report, and supplier coordination on schedule for the client's investment review.

Atlantic Lithium Scoping Study - Ghana | Process Engineer & Study Manager

- Managed scoping study for downstream processing of lithium concentrate (SC5.5–6) to Lithium Carbonate and Lithium Sulphate, including location trade-off analysis, financial modelling, and risk assessment across multiple processing scenarios.

Victory Metals Rare Earths Scoping Study - Australia | Process Engineer & Project Coordinator

- Contributed to scoping study for an 8 Mtpa ROM rare earth processing plant targeting 11,913tpa TREO annual production; responsibilities included mass balance verification, process engineering review, and CAPEX/OPEX estimation for multiple technology options.

NPMC Bi Cake Gold - NuiPhao Mining, Vietnam | Process Consultant

- Provided process consulting for gold extraction from bismuth cake; led technology options selection and delivered dashboard summary for client decision-making.

Additional Projects (Study Manager / Process Engineer role)

- 1421 Kumul Gold Refinery Technology Study - technology comparison and selection for PNG gold refinery.
- 1338 AIE Heap Leach Facility - cost estimation and project coordination, Armenia.
- 1451 Tan Phat Nickel - process consulting and cost estimation for surge tank project, Vietnam.
- 1249 Hillgrove Restart - PFD/P&ID review and pump calculation, Australia.
- 1198 Pyrolysis Tyre Plant - CAPEX estimation and financial analysis.

Process Engineer | IntES Vietnam Co., Ltd.

Apr 2022 - Oct 2023

IntES - FEED and detailed engineering for oil & gas, chemicals, and food & beverage

- Provided FEED and Basic Engineering Design services for EPC/EPCm projects in Vietnam, the Netherlands, and the Philippines - covering P&ID/PFD development, mass & energy balancing, equipment sizing, and hydraulic calculations.
- Led HAZOP, HAZID, and SIL preparation for major process safety studies; ensured compliance with Vietnamese regulations and international codes (IEC, ATEX, API).
- Executed process simulations in HYSYS for FEED on CTS Benelux (Netherlands) projects.
- Key project contributions: Onsemi B1T Ramp Up (utility systems FEED, Vietnam), PepsiCo Foods North detailed design, P&G Binh Duong upgrading (multiple scopes), Heineken Quang Nam WWTP, Brenntag Solvent Mixing Plant EPCm, ADM Philippines Dust Hazardous Area Classification (ATEX zoning), Westlake Compounds Value Engineering.

Process Engineer | Masan Tungsten LLC

Feb 2020 - Apr 2022

Masan High-Tech Materials - Tungsten processing, Nui Phao Mine, Vietnam

- Drove process optimisation initiatives reducing grinding cycle time by 50% (10 hrs → 5 hrs), extending filter cloth service life, and recovering off-spec products - delivering measurable cost savings across the tungsten production facility.
- Designed and commissioned a new agitator system for reactor mixing tanks; independently led pilot-scale trials for caustic displacement wash, reducing acid sulfuric and caustic chemical consumption.
- Developed mass balance Excel models to evaluate chemical and energy consumption across ore feed scenarios, informing production planning and cost reduction decisions.
- Authored SOPs for multiple-effect evaporator sodium tungstate systems and developed customer-specific yellow tungsten oxide recipes.
- Supported commissioning activities for tungsten production facilities in Vietnam and Germany.

Chemical Engineer & Project Coordinator | Green Environment Production and Trade Services Co., Ltd.

Sep 2015 - Feb 2020

GECO - Waste treatment and renewable energy projects

- Designed and implemented industrial and domestic waste treatment systems; developed a pyrolysis process converting waste rubber into high-calorific-value diesel fuel, and managed acid residue treatment from waste oil refining operations.
- Established the company's technical laboratory from the ground up in compliance with ISO 17025:2017, including equipment qualification and testing procedure development.
- Contributed to development of a furnace system utilising energy from sludge, heavy oil, and excess gas from rubber pyrolysis operations.

EDUCATION

B.Eng., Petrochemical / Chemical Engineering

2010 – 2015 - Hanoi University of Science and Technology (HUST)

CERTIFICATIONS

Project Management Professional (PMP®)

Project Management Institute - Issued Jul 2025 - Valid to Jul 2031 - No. 4159343

Risk Assessment & Functional Safety

SIL-HAZOP - SETECH - Issued Nov 2022

LANGUAGES

Vietnamese Native

English Professional Working Proficiency (daily written and verbal use in international project settings)
